

The logo for RapidRedact, with 'RAPID' in white on a dark grey background and 'REDACT' in red on a white background.

Redact | Review | Release

A stack of papers with various text and redaction examples. The text includes 'Redact information in [redacted] electronic documents and [redacted] completely remove hidden data [redacted]'. The redactions are represented by black rectangular boxes.

Product Sheet

RapidRedact Desktop

'Easily and effectively reduce the time it takes to redact your documents, review them, create an audit trail, and release redacted copies for public viewing. '

RapidRedact Desktop is a fast, easy-to-use redaction software tool for irreversibly blanking out (redacting) selected information and meta data from all electronic document types. Since the redacted content is no longer in the document, snooping or hacking into the file cannot reveal it.

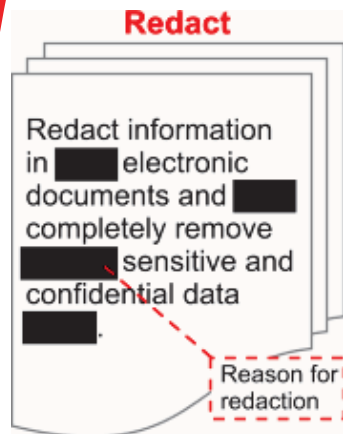

Automatically search and redact personal information such as social security numbers, credit card numbers, names, post codes, email addresses, etc. Review the redactions and make further changes using manual redaction tools.

RapidRedact benefits:

- Appropriate for redacting any electronic document, including Word, Excel, or PDF documents, scanned documents or images (such as TIFF, GIF & JPEG) and emails (including attachments)
- Automatically redact lists of sensitive words and phrases, credit card numbers and IP addresses
- RapidRedact can assign FOI and Data Protection Act exemption codes
- Suitable as a stand-alone redaction tool, or on a server accessed by multiple users
- Use for secure document conversion (eg MS Word to pdf or tif), even where redaction is not required
- Can be integrated with any ODMA compliant document management system
- Demonstrable sustainability improvements for organisations endeavouring to be environmentally friendly
- Offers a transparent audit trail copy of the redacted document for future reference
- Guards against identity theft by securely redacting signatures, credit card numbers. Addresses, etc
- Removes hidden data from Word Processing formats (authors, revisions etc.)

CMS Software Ltd

Open ANY electronic document

Redact:

- Search Terms
